TECHGYANIC

Presents

Bankend Development Workshop + Internship

A dive deep into some of the most popular and highly demanded backend frameworks and technologies

Learn to code like a pro, just like it’s done by top developers in the industry!

Why understanding software programming fundamentals is crucial ?

95% engineers in India unfit for software development jobs: Report

techgyanic.com
TECHGYANIC

Nearly eight lakh BE/BTech students graduated last year, but only less than half of them got jobs through campus placement, says AICTE.

A few years ago, a McKinsey report said just a quarter of **engineers** in India were actually employable. Of late, some other studies put it at less than 20%. Recently, a survey by employability assessment firm Aspiring Minds said 95% of Indian engineers can't code.

95% engineers in India unfit for programming jobs: study

Only 4.77% engineering students can write correct logicthe minimum requirement for any computer programming job, over two-thirds are inept at coding

PTI

Updated • 20 Apr 2017, 08:37 PM IST

Synopsis

The study further noted that while more than 60% candidates cannot even write code that compiles, only 1.4% can write functionally correct and efficient code.

Programming Language Used:

Golang

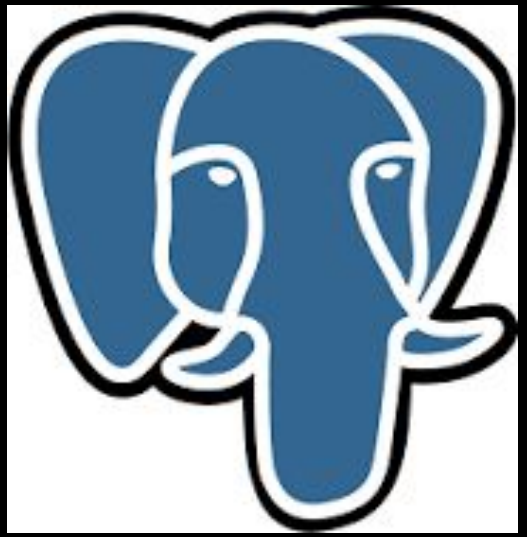
Why Golang ?

- *Faster*
- Easy
- High In Demand

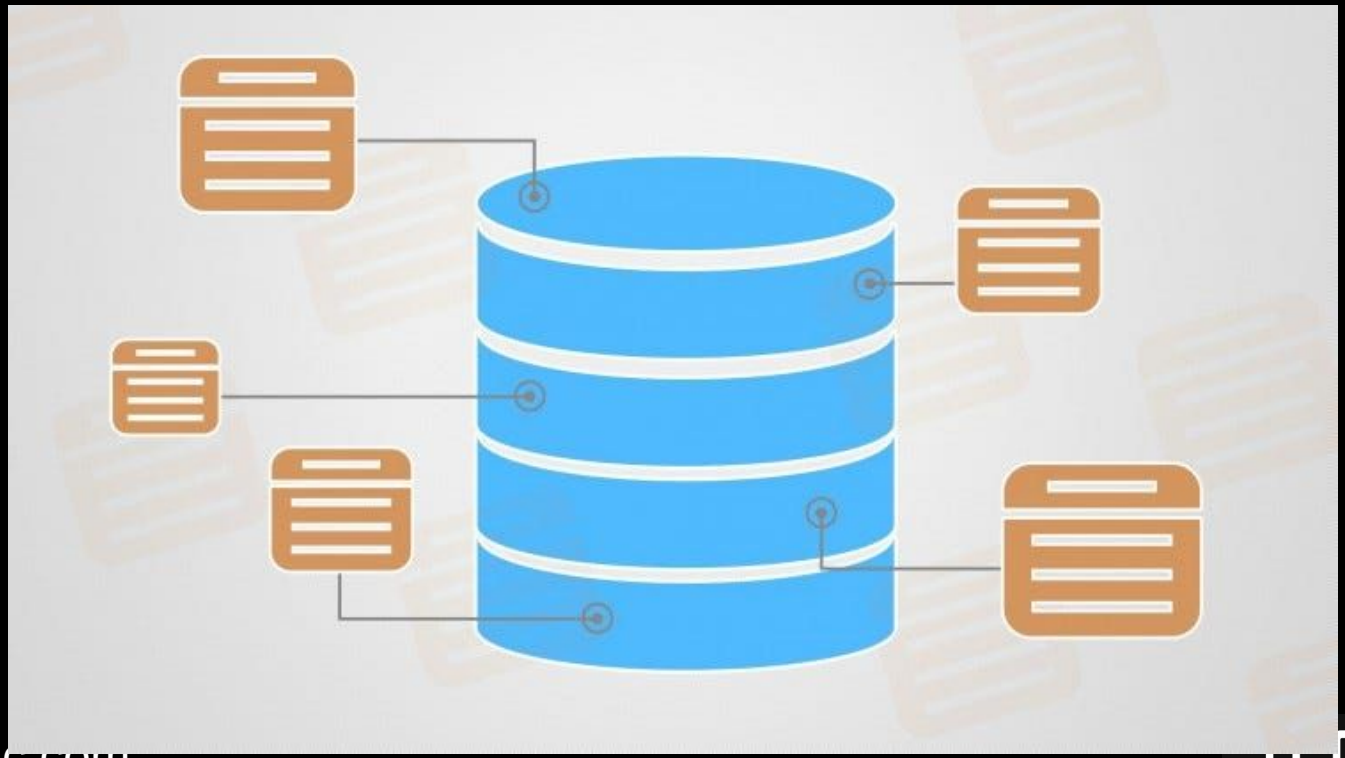
Workshop Topics

Building RESTful APIs with Golang's Fiber

Storing and retrieving data with Postgres

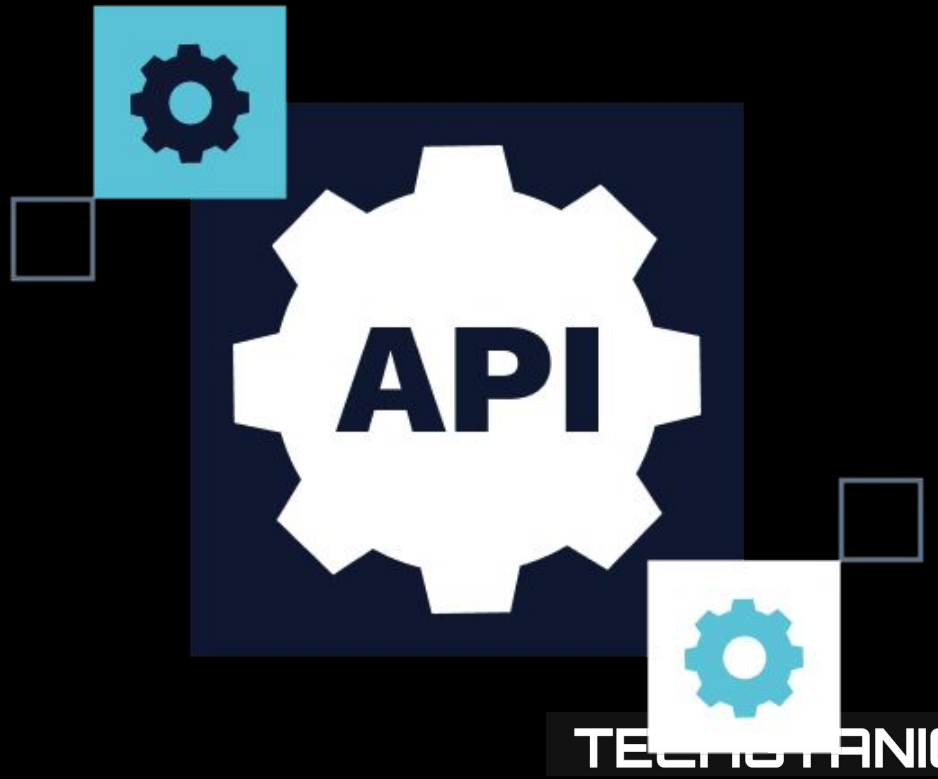


Database design and modeling



Building your own Authentication system

Testing and debugging backend applications using Postman

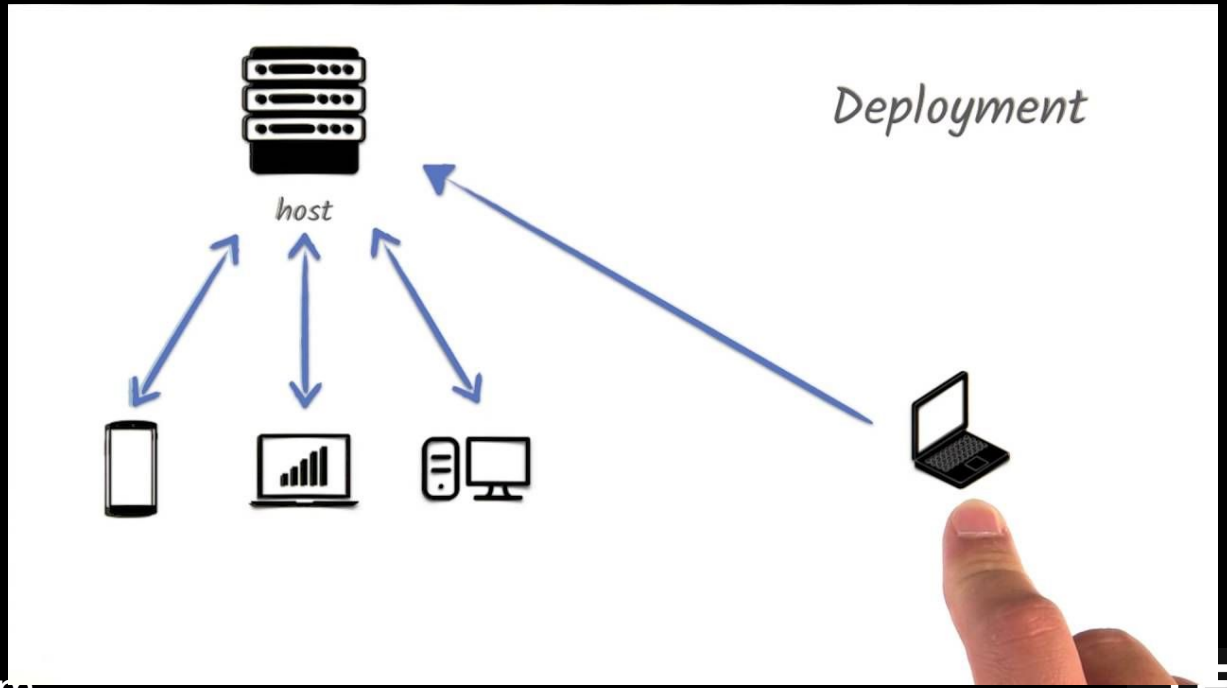


techgyanic.com

Visualizing and interacting with databases using DBVear

Git and Github

Deployment



Hands-On and Engaging

Access to Industrial Projects post workshop.
